Hiring Team
INDG / Grip

Subject: Application for AI Workflow Specialist (ComfyUI)

Dear Hiring Team,

I'm writing to express my enthusiasm for the AI Workflow Specialist (ComfyUI) position at INDG / Grip.
With a multidisciplinary background bridging 3D visualization, generative AI, and creative automation, I have developed a deep technical and artistic understanding of how to design, refine, and scale AI-driven image workflows – exactly the core of what this role demands.

Over the past years, I have built and deployed advanced ComfyUI pipelines integrating ControlNET, inpainting, enhancement, and upscaling techniques for production-grade visuals. My daily work combines creative direction and technical control: translating concepts into modular workflows that ensure visual fidelity, style consistency, and repeatability. Beyond what's visible in my public portfolio, I've also developed confidential AI–CGI workflows for global brand campaigns, under NDA, which streamlined content delivery without compromising quality.

Currently, as a Performance Ads Designer at GrowthHit (US) and Founder of Bound Visuals, I integrate AI automation into performance creatives for Meta, LinkedIn, and Google campaigns – blending data-driven iteration with refined visual craft. My technical fluency extends across ComfyUI, KLING, VEO 3, Runway, ArcadsAI, Visual Electric, and Reve Image, enabling me to prototype, test, and optimize AI workflows efficiently within any visual production environment.

What truly excites me about INDG / Grip is the opportunity to join a team that merges creativity with scalability – turning AI pipelines into structured systems that elevate global brand storytelling. I'm confident that my experience designing template-based AI workflows and my strong eye for detail would contribute meaningfully to INDG's mission to make content production more intelligent, flexible, and future-proof.

In short:

Advanced user of ComfyUI and ControlNET for workflow design and automation

Strong foundation in AI for Image & Video, CGI, and 3D visualization

Experienced in creative systems thinking – building modular, reusable AI setups

Proven ability to combine technical precision with visual excellence

Fluent in English (C2); adaptable to international, cross-functional collaboration

I would be delighted to further discuss how my experience can support INDG's AI workflow initiatives.
Thank you for considering my application – I look forward to the opportunity to contribute and grow with your team.

Warm regards,

Vítor Hugo Barros da Silva
AI & CGI Workflow Specialist | ComfyUI Expert
