Workflows

Confidentiality Notice

Some of my most advanced AI and CGI workflows were developed for global brand campaigns under NDA. For confidentiality reasons, they are not displayed here – but I'm happy to walk through those projects in detail during a private discussion or live call.

About this Portfolio

This document presents a focused overview of key AI techniques – including Text to Image, Image to Image, Inpainting, Enhancement, and Upscaling.
These examples highlight the core capabilities of my daily workflow: from pure generation to technical refinement and production-ready outputs.

However, they represent only a small part of what I work with.
Beyond what's shown here, I also design and implement advanced processes involving Object Migration, CGI + AI Integration, external AI API tools (Arcads, Reve, Visual Electric), Paid AI systems inside ComfyUI, Video and Sound AI, Viewport to Image conversions, Style Transfer pipelines, and other complex automation workflows.

Showing every single workflow would make this portfolio infinite – so this version focuses on what's most relevant, keeping it clean and concise.
The broader technical setups and confidential projects can be reviewed privately during an interview or video call.

Each workflow featured here includes a recorded Making Of – showing the real ComfyUI process, step-by-step, from prompt to final image.
Watching these short videos is the best way to understand how I actually build, control, and refine each visual.
(All videos are available through the "Making Of" links next to each image.)

Closing Note

This portfolio is designed to be a transparent, technical, and creative overview of how I build AI-driven workflows for production.
It's a concise showcase – the full scope of my research and applied systems extends far beyond these pages, ready to be discussed when needed.

PRESENTATION

VÍTOR HUGO BARROS DA SILVA

3D Artist · Performance Ads Designer · AI Expert for Image & Video

28 . 01 . 1993
Penafiel // Porto // Portugal

WEBSITE
boundvisuals.com

I'm a 3D Artist specialized in Architectural Visualization (ArchViz) and product CGI, experienced in producing photoreal renders, real-time previews and animations with Unreal Engine, Blender, Corona Renderer, KLING, VEO 3, and more.

Since early on, my dream has been to dive into cinema and the broader world of imagery – especially 3D. That passion drives me to keep learning, growing, winning and aiming high. I also care deeply about supporting others, because creativity thrives in collaboration.

In parallel, I work as a Performance Ads Designer (US agency, 2024–present), creating end-to-end creatives for Meta, LinkedIn, Reddit and Google: static, motion and UGC. I operate with fast iteration cycles and a data-driven mindset, preserving brand consistency and execution quality.

Key differentiator: advanced, professional AI applied to image and video. I integrate AI across the pipeline without sacrificing fidelity or craft: from from-scratch generation and visual ideation, to editing and enhancement (inpainting, upscaling, artifact correction, denoising), plus automation of creative workflows to accelerate delivery while keeping artistic control.

Tooling I master: ComfyUI, KLING, VEO 3, ArcadsAI, Runway, Google Gemini, Nano Banana, Visual Electric, Reve Image, etc.

What I deliver:
· ArchViz – photoreal exteriors/interiors, materials/lookdev, lighting, post; cinematic shots; interactive previews for review.
· Product CGI – stills and animated visuals with fine detail and realism.
· Performance Ads – multi-format production (1:1, 9:16, 16:9), speed-to-creative, data-guided iteration.
· Post – high-end image retouch (Photoshop + AI), video editing, sound tweaks.

How I work: clear brief -> rapid prototypes -> short iteration loops -> controlled final delivery. Clean communication; organized versioning; backups and file hygiene. Open to art tests or proof-of-concepts.

Languages: Portuguese native · English C2 · French intermediate (B2 in progress) · Spanish intermediate · German beginner.
Mobility: Open to opportunities in French- and German-speaking Switzerland; preference for international English-friendly environments.

RECOMMENDATIONS

Harun Asefa
VP of Operations at GrowthHit

Vitor has been working with us at GrowthHit for almost two years, and he's been incredible to work with. He's professional, creative, and really knows his stuff when it comes to paid ad creative.

What I appreciate most is how forward-thinking he is. Vitor has completely changed how we test and use AI in our creative process. He's always pushing us to try new tools and new ways of working, and that's had a big impact on our team.

On top of that, he's just a great person to collaborate with – reliable, easy to work with, and always bringing fresh ideas. I'd highly recommend him to anyone.

Angela Brugioni
Creative Director | Partner at Neat Apparel

I had the pleasure of working with Vitor on performance ad campaigns, where his creativity and eye for detail elevated every project. He has been a champion at integrating AI into the design process, and his

adaptability made the work both innovative and effective.

Yevheniia Moroz
Digital Designer

Working with Vitor has been a truly inspiring experience. As a fellow designer, I've been amazed at how effortlessly he blends creativity with technical skill, especially in the areas of AI image and video generation. His work is always polished, imaginative, and a step ahead of the curve.

What I value most about collaborating with him is his openness and generosity – he's always willing to share knowledge, exchange ideas, and push concepts further.

Vitor is not just a talented creator, but also a great teammate – someone who makes the process enjoyable while consistently raising the bar.

Daniel Ferreira
Media Buyer | User Acquisition Manager | PPC Specialist | Paid Media Specialist

Working with Vitor was a real privilege, as it gave me the chance to see not only the high standard of his work but also the thoughtful way he tackles challenges. He was always open to sharing his knowledge, particularly in design, web development, and editing, and I benefited greatly from his support and insights.

What I admired most was his originality and talent in 3D – every project he created had something unique that stood out. Beyond his technical expertise, Vitor combines professionalism with a strong sense of responsibility. He's dependable, collaborative, and someone you can always trust to deliver outstanding results.

Pedro Rocha
eRetail Search Coordinator at Nestlé | MSc in Data Driven Marketing | SEO | Digital Marketing

I had the pleasure of sharing an office with Vitor, which gave me the opportunity to see firsthand the quality of his work and the way he approaches challenges. He was always willing to help me, especially with design, web development, and editing skills, and I learned a lot from his guidance.

What stood out the most was his creativity and talent in 3D – his projects never failed to impress me. Beyond his technical expertise, Vitor brings a strong work ethic and a real sense of responsibility to everything he does. He's reliable, collaborative, and someone you can always count on to deliver great results.

André Ferreira
Media Buyer | PPC Specialist | User Acquisition Manager | Paid Media Specialist | Digital Marketer

I had the opportunity to work with Vitor on several projects. As a graphic designer, he combines creativity, precision, and an excellent understanding of client needs. He particularly stands out in creating ads for platforms like Meta, producing images and videos that not only capture attention but also deliver the message clearly and effectively.

Highly professional, with great attention to detail and a strong ability to meet deadlines – he's an invaluable asset to any team.

Daniel Oliveira
Architect and Project Manager

An outstanding professional. Technically knowledgeable, always up to date, and constantly eager to learn.

His broad skill set – including 3D, design, video, image editing, and production assistance – gives him a wide perspective and enables highly effective responses to any challenge presented to him.

Angelina Pereira
Master's Student in Service Engineering and Management

I had the privilege of working with Vitor Hugo, and I can confidently say that his combination of talent, professionalism, and creativity is truly exceptional. With impressive experience in 3D, marketing, and web development, Vitor not only delivered high-quality results but also guided and supported me in each of these areas with clarity and effectiveness.

What stands out most about Vitor is his ability to combine strategic vision with meticulous attention to detail. He can transform complex ideas into practical, creative, and visually compelling solutions.

Moreover, his collaborative, empathetic, and approachable attitude makes working with him an inspiring and motivating experience.

I wholeheartedly recommend Vitor Hugo to anyone looking for a multifaceted, innovative, and reliable professional. His contribution was decisive to the success of the projects we worked on together, and I'm certain he will continue to exceed expectations in any challenge he takes on.

Text to Image

The foundation of every project – pure generation from text.
This is where ideas take visual form: architecture, products, people, and advertising concepts.
Each image is generated from detailed physical prompts that simulate real camera behavior, material accuracy, and lighting conditions.

Explore full view on my site

Prompt:

ultra-photoreal architectural exterior, minimalist concrete villa with low-iron glass façade, floor-to-ceiling windows, early morning sunlight grazing travertine terrace, long soft shadows across stone floor, realistic GI reflections, pine forest in background with light haze,
neutral exposure, 24mm architectural lens, crisp micro-roughness on concrete, soft volumetric light entering living room, premium magazine photography style.

Watch making-of video

Explore full view on my site

Prompt:

commercial product photograph of a performance running shoe on wet asphalt, low-angle 35mm camera, warm golden-hour reflections, soft rim light behind, water droplets visible, realistic fabric knit texture and TPU reflections, shallow depth of field, cinematic advertising composition, no logos, realistic lighting bounce from ground, neutral tone balance.

Watch making-of video

Explore full view on my site

Prompt:

luxury perfume bottle with golden liquid, on white marble surface with fine grey veining, studio gradient background from black to mid-grey, two large softboxes creating clean reflections on glass, controlled specular highlights, subtle caustics visible on marble, 85mm macro look, f/4 style depth, no dust or fingerprints, advertising photography lighting precision.

Watch making-of video

Explore full view on my site

Prompt:

female athlete studio portrait, subtle sweat sheen on skin, confident neutral pose, 2-point lighting setup: key softbox 45° camera right and cool rim light from behind, neutral grey seamless backdrop, 50mm lens framing chest-up, realistic skin texture and pores, balanced tone, professional editorial lighting.

Watch making-of video

Explore full view on my site

Prompt:

sports car in studio, three-quarter rear angle, glossy wet black floor, clean controlled rim reflections along body lines, metallic graphite paint with fine flake texture, soft light gradient on background, 70mm product lens, advertising studio shot aesthetic, realistic tire and metal microtexture.

Image to Image

Reinterpreting and refining existing visuals – keeping geometry while improving light, tone, and atmosphere.
Perfect for converting renders or AI images into campaign-ready artwork.

BEFORE

AFTER

Prompt:

convert daylight architectural render into warm golden-hour atmosphere, extend highlight latitude, add volumetric haze near horizon, soft sunlight reflections on glass, warm orange hue (4800K), increase shadow depth slightly, maintain geometry and surface realism, balanced contrast, filmic tone curve, subtle vignette for photographic look.

Watch making-of video
Explore full view on my site

BEFORE

AFTER

Prompt:

restyle product into premium studio lighting setup with gradient background (charcoal to soft grey), precise reflections and soft edge highlights, neutral color calibration (5000K), smooth falloff between highlight zones, commercial advertising aesthetic, retain geometry and materials, no color cast, clean exposure balance.

Watch making-of video

vitorhugobs@hotmail.com
+351 913 215 170

BEFORE

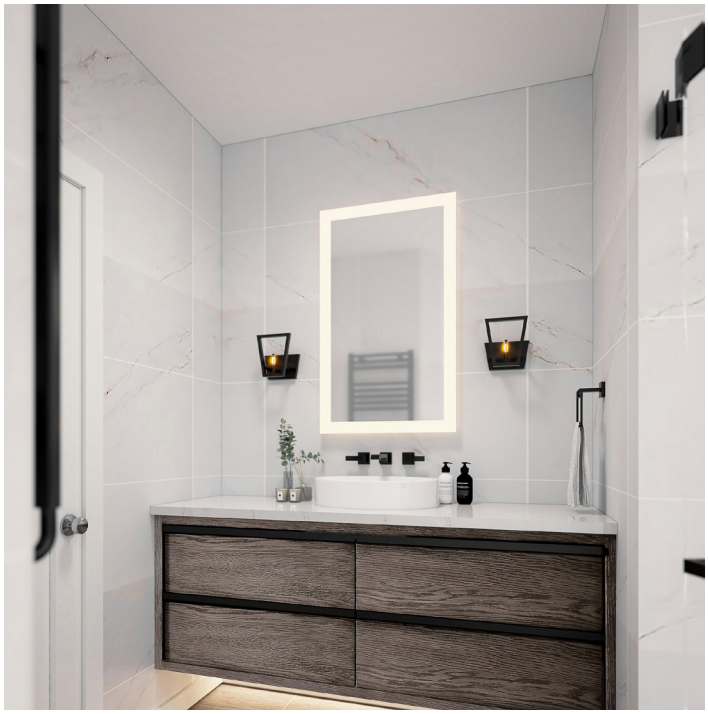

AFTER

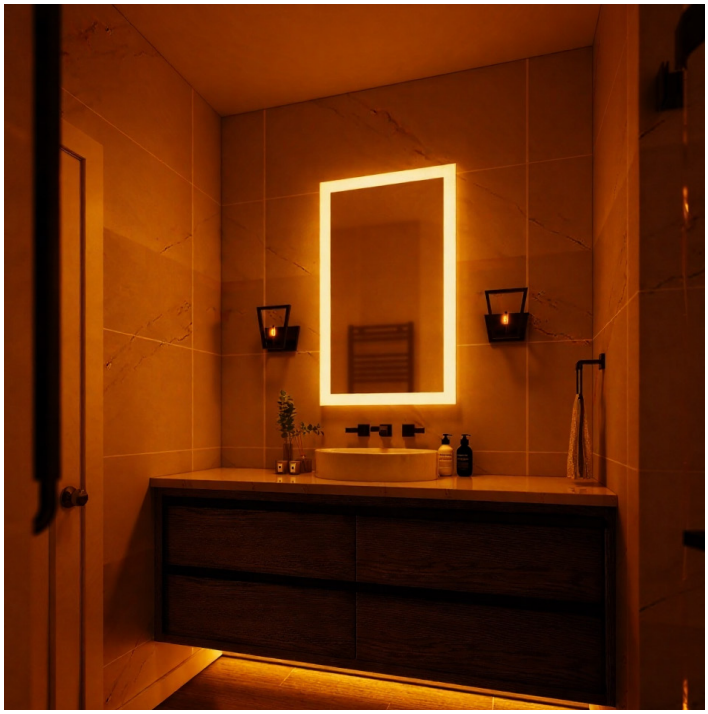

Prompt:

apply cinematic grade with warm amber midtones and cool teal shadows, preserve natural skin texture and microcontrast, add fine filmic grain, balance rim light and highlight roll-off, enhance color depth while keeping saturation natural, achieve editorial campaign tone, professional portrait finish.

Watch making-of video
Explore full view on my site

BEFORE

AFTER

Prompt:

convert neutral daylight interior into cozy evening ambiance, add lamp glow pools and warm practical light falloff, preserve material albedos and geometry, increase shadow depth for contrast, realistic light bounce on walls, white balance around 2800K, cinematic interior mood.
